DETAIL OF ACCREDITATION

| Materials/Products tested | Type of test/Properties measured/Range of measurement | Standard specifications/ Equipment/Techniques used |
|---|---|--|
| <p>MICROBIOLOGICAL CULTURE MEDIA Ready to use or partially completed liquid and solid (agar) media, including diluents, packaged for retail</p> | <p><u>Microbial Performance Tests</u></p> <p>Evaluation of growth promotion on solid media (productivity and selectivity)</p> <p>Evaluation of growth promotion in solid or liquid media (productivity and selectivity)</p> | <p>Documented In-house methods based on ISO11133:2014 +A2:2020 in conjunction with Product Specifications</p> <p>1) SOP QC.211 quantitative evaluation of recovery of low numbers of specified target organism(s) and inhibition of specified non-target organisms from a high inoculum using spread plate technique</p> <p>2) SOP QC.230 semi-quantitative evaluation of recovery of specified target organism(s) and inhibition of specified non-target organisms using streak plate technique</p> <p>3) SOP QC.760 qualitative evaluation of growth from a high inoculum using single streak technique</p> <p>SOP QC.210 qualitative visual assessment of growth of target organisms from a very low inoculum (<10cfu), low level inoculum (10-100cfu) and of non-target organisms from a higher level inoculum (>10000cfu)</p> |

4356
Accredited to
